The Power of AvaTax: Real-time access to the most current rates and taxability rules within any ERP or billing system.

ADDRESS VALIDATION

The AvaTax calculation engine encompasses the most accurate and up-to-date address data available. Input addresses are automatically checked and corrected for spelling errors and inaccurate street names. Five-digit zip codes are appended to nine-digit accuracy.

SOURCING RULES

AvaTax is programmed with the latest information for handling destination based, origin based and hybrid sourcing rules, ensuring the most accurate possible assignment of tax rates based on individual transactions.

JURISDICTION ASSIGNMENT

Using advanced geocoding technology, transaction addresses are pinpoint positioned within all applicable jurisdiction boundaries. Geo-positioning provides the basis for precise identification of tax jurisdictions and roll-up to a total tax rate.

PRODUCT TAXABILITY

The AvaTax service includes researched and validated system tax codes into which are assigned a broad array of product categories and individual products. This provides highly accurate taxability assessments and ensures the correct rates are calculated for all products and services.

REPORTING

Generating summary and detailed reports on-demand, easily and accurately, AvaTax gives you complete visibility to all transactions. Export your data for filing, or for complete end-to-end automation, use Avalara Returns for fully outsourced sales tax compliance management.
